OUR VISION FOR THE FUTURE

EUGLOH will combine its members' expertise and resources in **Global Health** to offer the most competitive and attractive education and training to their students in one **multicultural, integrated and inclusive campus**.

EUGLOH envisions positioning European higher education and research at the forefront by training future generations of European citizens as leaders, innovators, experts who will serve all sectors of society to face **interdisciplinary societal challenges related to Global Health**. These challenges include,

among others, the future of medicine and emerging diseases, the impact of climate change and environmental hazards, digital health and technologies for health and well-being, public health, health economics and management, healthy life and well-being (food, nutrition, etc.). At the same time EUGLOH will promote **European values** such as solidarity and inclusion, equality, respect for human rights and access to welfare.

EUGLOH will design **student-centred curricula**, meaningful to life-long professional and personal

development, allowing learners to adapt to a changing labour market. For this purpose, **problem-based or work-based learning, cross-disciplinarity and internationalisation**, and the use of **innovative pedagogical tools** (e.g. virtual and blended mobility, digital tools), will be fostered. In parallel, staff mobility and exchange of best practices between the partners will be a key feature of EUGLOH.

EUGLOH is unique because of the extensive expertise in **research and innovation** of the five member universities in global health and related fields, as well as the

unique **set of large-scale infrastructures**, and their **strong regional ecosystems**. Research & Innovation actors will contribute to teaching and training to create research-oriented tracks and promote entrepreneurship.

Taking a **long-term perspective**, EUGLOH will become an internationally recognised **observatory** of best practices and expertise in Higher Education, Research and Innovation **for Global Health** and will **set the foundations for a common European health area**.

PUTTING OUR VISION INTO PRACTICE

KEY DELIVERABLES / ACTIVITIES

- ➔ **Pilot cross-disciplinary and/or multiple degree European curricula** to address global health areas.
- ➔ Joint **short programmes** on the development of **transversal research skills** for students and on **entrepreneurship and professional skills** development.
- ➔ **Annual Summit** bringing together students, staff, enterprises with sessions focused on EUGLOH best practices and future actions.
- ➔ **Annual staff weeks** on innovative and shared practices, including pedagogical innovation, student health, mobility management and tools, inclusion strategy and more.
- ➔ Annual call for the development of '**EUGLOH campus life**' initiatives, open to both students and staff.

HOW OUR ALLIANCE WILL TRANSFORM OUR UNIVERSITIES

- ➔ **Shared** decision-making through the **governing board** responsible for the overall implementation of the project, which includes adaptation of the institutional practices and resources.
 - ➔ A **joint management organisation** dedicated to the development of joint procedures, new practices and tools to ensure the implementation of transnational projects.
 - ➔ The development of **efficient numeric strategies and tools**, such as video conference systems to foster blended and virtual mobility and digitalisation of workflows, as well as online platforms to manage mobility, projects and more.
 - ➔ The development of a **transnational and trans-sectoral network with the enterprises and associations of the five regions** in the Global Health domain.
 - ➔ An array of **multiple degrees** and **shared procedures for evaluation**.
